

## **STRICTLY NO AGENCIES**

### **Calling all Commissioning Engineers!**

We are recruiting... and if you have a passion for all things lighting and commissioning, then this could be the job for you!

### **Firstly, a little bit about us.**

Founded in 1995, we are at the forefront of the latest developments in LED Lighting Design and Lighting Controls. With in-house design and development, including our own photometric testing lab, we undertake extensive research and are dedicated to LED innovation and product design.

It is the people at LDL who continue to push boundaries and epitomise innovation, making us the company we are.

We are a progressive company with significant year on year growth over the past 4 years, and we continue our focus on long term growth and going from strength to strength. As a result of this, we are looking to expand our team.

### **The Role:**

**Job Title:** Commissioning Engineer (Lighting)

**Location:** Head Office, Wigan– Travel Required

**Job Type:** Full-Time

### **Position Overview:**

We are seeking an experienced Commissioning Engineer to join our growing team. The ideal candidate will have a strong electrical background, a passion for problem-solving, and hands-on experience with Casambi lighting commissioning. You will play a key role in ensuring the successful installation and commissioning of lighting systems for our clients, offering technical support, and ensuring that all systems function to the highest standards.

### **Key Responsibilities:**

- Commission lighting control systems, with a particular focus on Casambi technologies.
- Troubleshoot, diagnose, and resolve issues on site related to lighting and electrical systems.
- Work closely with project managers, contractors, and clients to ensure successful project delivery.
- Provide on-site technical support and ensure that the installation meets project specifications and safety standards.

- Maintain high standards of customer service, ensuring positive client interactions throughout the commissioning process.
- Perform system testing and programming adjustments as required.
- Travel to various locations for site visits and installations, which may involve working away from home on occasion.
- Work flexible hours, as project demands dictate.
- Provide feedback to the team and contribute to continuous improvement processes.

#### **Essential Skills & Qualifications:**

- **Experience:** Proven experience as a Lighting Site Engineer, Commissioning Engineer, or similar role.
- **Electrical Background:** Strong understanding of electrical systems and standards.
- **Casambi Commissioning:** Hands-on experience with Casambi lighting control systems.
- **Problem Solving:** Ability to diagnose and resolve technical issues independently and efficiently.
- **Customer Service:** Excellent communication skills and a customer-focused attitude.
- **Work Autonomy:** Comfortable working independently and managing your own workload.
- **Flexible Hours:** Willingness to work outside of normal working hours, as required by the project schedule.
- **Travel:** Must be willing to travel and work away from home when necessary.

#### **Desirable Qualifications:**

- Formal electrical qualifications
- Experience with other lighting control systems is a plus.

#### **Additional Information:**

- A company van will be provided for travel to and from sites.
- Competitive salary, commensurate with experience.
- Opportunities for career development and progression.
